

INDEX

- Acetylcholine, effect of, on gastric secretion in pernicious anaemia, 379.
- Achlorhydria, and achylia gastrica, and their connexion with the Addison's anaemia-subacute combined degeneration syndrome and simple (non-Addisonian) achlorhydric anaemia, 157; age and sex incidence of, 157; causes of, 159; without achylia, 163; preceding the development of carcinoma of the stomach, 167; following gastro-jejunostomy, 172.
- Acid, secretion of, in pernicious anaemia, 361.
- Addison's anaemia-subacute combined degeneration syndrome and simple (non-Addisonian) achlorhydric anaemia, achlorhydria and achylia gastrica, and their connexion with, 157; chronic gastritis of, 165; following achlorhydria due to alcoholic and dental gastritis, 165; in carcinoma of the stomach, 170; resulting from gastro-jejunostomy performed for gastric ulcer, 173; relation of, to simple achlorhydric anaemia, 175.
- Addison's disease and its treatment by cortical extract, 99; dosage of cortical extract and method of administration in, 99; effect of cortical extract on symptoms and signs of, 113; blood-sugar in, 116; carbohydrate tolerance in, 118; occurrence of diabetes mellitus with, 120; blood-urea in, 121; urinary creatine and creatinine in, 123; inorganic phosphates in, 125; blood cholesterol in, 125; blood count in, 125; radiology in diagnosis of, 127; role of adrenalin in treatment of, 127; intravenous saline and glucose in treatment of, 128.
- Adrenalin, role of, in treatment of Addison's disease, 127.
- Aleukaemic myelosis of the leucopenic type, clinically simulating chronic aplastic anaemia, 409.
- Anaemia associated with Gee's disease, 623.
- Anaemia with dysphagia, 41.
- Anaemia, achlorhydric, simple (non-Addisonian) and Addison's anaemia-subacute combined degeneration syndrome, achlorhydria and achylia gastrica, and their connexion with, 157; relation of Addison's anaemia to, 175.
- Anaemia, Addison's, *see* Addison's anaemia.
- Anaemia, aplastic, 437.
- Anaemia, aplastic, chronic, aleukaemic myelosis of the leucopenic type, clinically simulating, 409.
- Anaemia, macrocytic haemolytic, 543.
- Anaemia, pernicious, gastric secretion in, 361; secretion of acid, chlorides, and pepsin in, 361; free hydrochloric acid in, 367; experiments on gastric secretion in, 378; action of histamine on gastric secretion in, 378; effect of acetylcholine on gastric secretion in, 379; effect of liver and stomach preparations on gastric secretion in, 380.
- Anaemia, red-cell, pure, 436.
- Angina, agranulocytic, 425.
- Aorta, syphilis of, treatment of, 179.
- Aortitis, effect of treatment on, 202.
- Blood cholesterol in Addison's disease, 125.
- Blood count in Addison's disease, 125.
- Blood-diseases, certain, a correlation of, on the hypothesis of bone-marrow deficiency or hypoplasia, 425.
- Blood-sugar in Addison's disease, 116.
- Blood-urea in Addison's disease, 121; significance of alteration in, in diabetic coma, 353.
- Bone-marrow deficiency or hypoplasia, a correlation of certain blood-diseases on the hypothesis of, 425.
- Bradypnoea, persistent, in a case of post-encephalitic Parkinsonism, some observations on, 319.
- Bronchiectasis, a clinical and pathological study of, 457; seat and extent of dilatations, 460.
- Broth, glycerinated veal peptone, incidence of skin sensitivity to, and its relation to tuberculin sensitivity, 53; comparison of 'tuberculin power' of various samples of, 57; component of, responsible for 'tuberculin power', 58; preparation of, used in this investigation, 65.

- Caecum and appendix, 268.
- Cancer, lung, primary, occupational incidence of, 31.
- Carbohydrate tolerance in Addison's disease, 118.
- Cardiovascular disease, permanent organic, after thyrotoxaemia, 579.
- Cardiovascular syphilis, incidence of, 179; essential lesions of, 183.
- Children, rheumatic, a study of sleeping pulse-rate in, 67.
- Chlorides, secretion of, in pernicious anaemia, 361.
- Coma, diabetic, significance of alteration in the blood-urea in, 353.
- Copper, occurrence of, in preparations of iron, 135.
- Cortical extract, its use in treatment of Addison's disease, 99; dosage of and method of administration of, 99; effect of, on symptoms and signs of Addison's disease, 113.
- Creatine, urinary, and creatinine, in Addison's disease, 123.
- Cutaneous reactions in acute rheumatism, 511.
- Diabetes mellitus, occurrence of, with Addison's disease, 120.
- Diabetic coma, significance of alteration in the blood-urea in, 353.
- Diathesis, rheumatic, in epidemic acute rheumatism, 88.
- Diphtheria, principles of active immunization against, 213; conductive lesions in, 281; electrocardiogram in, 277.
- Diphtheria prophylactics, some, relative value of, 213.
- Diuretics, effect of, 3.
- Dysphagia, anaemia with, 41.
- Electrocardiogram in toxic goitre, some aspects of, 9; in diphtheria, 277.
- Epilepsy, total exchange of water, sodium, potassium, and nitrogen in, 289.
- Erythema nodosum, aetiology of, a new conception, 141.
- Fever, undulant, in the north-east of Scotland, 303.
- Foci, septic, effect of removal of, on the course of nephritis, 499.
- Gastric secretion, in pernicious anaemia, 361; experiments on, in pernicious anaemia, 378; action of histamine on, in pernicious anaemia, 378; effect of acetylcholine on, in pernicious anaemia, 379; effect of stomach and liver preparations on, in pernicious anaemia, 380.
- Gastritis, chronic, causes of, 164.
- Gastro-intestinal phenomena in Gee's disease, 616.
- Gastro-jejunosotomy, achlorhydria following, 172; Addison's anaemia resulting from, 173.
- Gee's disease, 603; general manifestations of, 607; skeletal system in, 612; gastro-intestinal phenomena in, 616; nervous phenomena in, 621; anaemia in, 623; metabolic observations in, 632.
- Getting up, effect of, 3.
- Glucose, intravenous saline and, in treatment of Addison's disease, 128.
- Goitre, toxic, some aspects of electrocardiogram in, 9.
- Gravitation, effect of, on stomach form, 267.
- Heart disease, rheumatic, variation of pulse-rate in, 71.
- Heart, syphilis of, treatment of, 179.
- Heart-rate, normal variation in, during health, 70.
- Histamine, action of, on gastric secretion in pernicious anaemia, 378.
- Hydrochloric acid, free, in pernicious anaemia, 367.
- Hypoplasia (bone-marrow deficiency), hypothesis of, a correlation of certain blood-diseases on, 425.
- Idiopathic haemorrhagica purpura, 430.
- Idiopathic steatorrhoea (Gee's disease), 603; general manifestations of, 607; skeletal system in, 612; gastro-intestinal phenomena in, 616; nervous phenomena in, 621; anaemia in, 623; metabolic observations in, 632.
- Infection, effect of, 5.
- Infection, tuberculous, specificity of skin reactions in man in relation to, 49.
- Intestine, large, 269.
- Iron, preparations of, occurrence of copper and manganese in, 135.
- Lung cancer, primary, occupational incidence of, 31.

- Manganese, occurrence of, in preparations of iron, 135.
- Massage, effect of, on metabolism of normal individuals, 387; certain effects of, on metabolism of convalescing fracture cases, 401.
- Metabolism, disturbance of, observations on, produced by injury to the limbs, 233; of normal individuals, effect of massage on, 387; of convalescing fracture cases, certain effects of massage on, 401.
- Myelosis, aleukaemic, of the leucopenic type, clinically simulating chronic aplastic anaemia, 409.
- Nephritis, course of, effect of removal of septic foci on, 499.
- Nephritis, proteinuria in, quantitative observations on, 1; daily variation in protein concentration, 1; effect of diuretics, 3; effect of infection, 5.
- Nervous phenomena in Gee's disease, 621.
- Obesity, treatment of, 331.
- Occupational incidence of primary lung cancer, 31.
- Osteitis deformans, 471.
- Oxygen, ventilation equivalent for, 17.
- Osteomalacia associated with Gee's disease, 603.
- Parkinsonism, post-encephalitic, some observations on persistent bradypnoea in a case of, 319.
- Pepsin, secretion of, in pernicious anaemia, 361.
- Pneumothorax, artificial, after-history of, 415.
- Protein concentration, daily variation in, 1.
- Proteinuria in nephritis, quantitative observations on, 1; daily variation in protein concentration, 1; effect of getting up, 3; effect of diuretics, 3; effect of infection, 5.
- Pulse-rate, sleeping, in rheumatic children, a study of, 67; variation of, in rheumatic heart disease, 71; clinical value of estimation of, 73.
- Purpuras, aetiological grouping of, 430.
- Purpura, haemorrhagica, idiopathic, 430.
- Radiology in diagnosis of Addison's disease, 127.
- Respiration, effects of, on stomach, 265.
- Rheumatic diathesis in epidemic acute rheumatism, 88.
- Rheumatic heart disease, variation of pulse-rate in, 71.
- Rheumatic children, a study of sleeping pulse-rate in, 67.
- Rheumatism, acute, cutaneous reactions in, 511.
- Rheumatism, acute, epidemic, in a public school, 79; epidemiology of lacunar tonsillitis complicated by, 85; condition of tonsils in, 87; rheumatic diathesis in, 88.
- Saline, intravenous, and glucose in treatment of Addison's disease, 128.
- Skin reactions, specificity of, in man in relation to tuberculous infection, 49.
- Skin sensitivity, incidence of, to glycerinated veal peptone broth and its relation to tuberculin sensitivity, 53.
- Steatorrhoea, idiopathic (Gee's disease), 603; general manifestations of, 607; skeletal system in, 612; gastrointestinal phenomena in, 616; nervous phenomena in, 621; anaemia in, 623; metabolic observations in, 632.
- Stomach, carcinoma of, achlorhydria preceding the development of, 167; Addison's anaemia in, 170.
- Stomach, effects of respiration on, 265.
- Stomach, normal, and variations, 263.
- Stomach form, effect of gravitation on, 267.
- Syphilis, of aorta and heart, treatment of, 179; cardiovascular, incidence of, 179; cardiovascular, essential lesions of, 183.
- Tetany associated with Gee's disease, 603.
- Tetany, spontaneous overbreathing, 247.
- Throat, sore, epidemic, 83.
- Thyrotoxaemia, permanent organic cardiovascular disease after, 579.
- Tonsillitis, lacunar, epidemiology of, complicated by rheumatism, 85.
- Tonsils, condition of, in acute epidemic rheumatism, 87.
- 'Tuberculin power' of various samples of glycerinated veal peptone broth, comparison of, 57; component of glycerinated veal broth responsible for, 58.
- Tuberculin sensitivity, incidence of skin sensitivity to glycerinated veal peptone broth and its relation to, 53.

Tuberculous infection, specificity of skin reactions in man in relation to, 49.

Ulcers, peptic, alkalosis occurring in the alkaline treatment of, 527.

Undulant fever in the north-east of Scotland, 303.

Urine in Addison's disease, 122.

Viscera, abdominal, mobility of, 257; factors influencing form and position, 261.

Water, sodium, potassium, and nitrogen, total exchange of, in epilepsy, 289.
